WORK EXPERIENCE

InnovexIT
Full-stack Developer | September,2024-Present
In my role as a Full-Stack Developer at InnovexIT, I design and implement seamless full-stack solutions using Nextjs, Node.js, and MongoDB. I develop responsive interfaces and efficient backend services, focusing on scalability, performance, and aligning with business needs.

InnovexIT
Front-end Developer | February 2024-September,2024
Collaborated with a team of five in-house web designers to create innovative UI design and used Nextjs 14, tailwind CSS, and Typescript. Authored code fixes & enhancements for inclusion in future code releases and patches.

Codexpro
Mentor | February,2023-December,2023
I took the basic Python programming language course for 50-60 students in batch-wise. It was a very different experience as the classes were taken online.

PROJECTS

Lookme - Social media web application allowing users to upload, delete, and download images, featuring categorized images and search filters for a seamless user experience. Built with React.js, TailwindCSS, and Sanity CMS, integrated OAuth authentication for Google login.
